Jonathan Carpena

Front End Engineer

Los Angeles, CA (Open to Remote) | (310) 879-9209 | jonathancarpena99@gmail.com linkedin.com/in/jonathan-carpena | github.com/jonathancarpena | jonathancarpena.me

TECHNICAL SKILLS

Front End | JavaScript (ES5 and ES6), TypeScript, React, Redux, Next.js, jQuery, HTML5, CSS3, SASS, Apollo Back End | Node.js, Express, PostgreSQL, MongoDB, MySQL, RESTful API Development Testing/Deployment | Jest, Mocha, Chai, AWS (Amazon Web Services), Firebase, Heroku, Netlify Developer Tools | Git, npm, Webpack, Babel, Postman, TDD

SOFTWARE ENGINEERING APPLICATIONS

Nathan's Meal Prep | Full-Stack Software Engineer - https://nathansmealprep.netlify.app

2022

- A client web application that displays, manages and orders prepped meals. React | Node.js | Express | MongoDB | Netlify | Heroku

 Remodeled an existing e-commerce website to incorporate a content-managing portal allowing the client to configure their
 - meals, business availability dates, and customer orders.

 Improved website load-up speed by 83% going from 4000ms to 700ms.
 - Implemented **Redux** to keep track of user authentication, user's bag, and user's shopping session.
 - Boosted monthly website customer traffic and engagement by 65% over the first 3 months.
 - **GitHub:** https://github.com/jonathancarpena/nathans-meal-prep

Jolina's Lash Artist Services | Full-Stack Software Engineer - https://jolinalashes.netlify.app

2022

- A client web application that displays, manages, and reserves lash services. React | Node.js | Express | MongoDB | Netlify | Heroku
 - Architected a front-end service of a booking system to allow users to choose their lash service, select from the available reserve dates, input contact information, and receive notification of a successful booking.
 - Achieved Google page performance 98 by utilizing GZIP, Webpack, and React CDN
 - Facilitated discussions with clients to assess expectations regarding the timeframe, design, and user experience.
 - Deployed application by hosting the front end onto **Netlify**, the server onto **Heroku**, and the database onto **MongoDB Atlas**.
 - **GitHub:** https://github.com/jonathancarpena/jolina-lash-artist

Reddit Analyzer | Front-End Engineer - https://reddit-analyzer.netlify.app

2022

Data visualization tool for viewing Reddit users' data and Subreddit traffic activity.

Next.js | Netlify

- Devised and implemented an algorithm that process about 1000 pieces of data from the Reddit API to generate a Reddit user's kindness, a Reddit user's text-readability, and a Subreddit's time of most activity.
- Attained >90% test coverage using test-driven development to deliver a high-quality application.
- Implemented server-side rendering with **Next.js** to improve page load time, attaining a Google Lighthouse SEO score of 100.
- Reduced total lines of code by 1000 by developing a reusable chart analysis React component.
- **GitHub:** https://github.com/jonathancarpena/reddit-analyzer

Pokemon Guesser | Front-End Engineer - https://pokemon-guesser-game.netlify.app

2021

Guessing game using Pokemon silhouettes and Pokemon sounds.

React | Node.js | Express | MongoDB | Netlify | Heroku

- Deployed an application built with two other engineers over the course of 40 hours.
- Cooperated with the team's design lead to implement design expectations.
- Expanded on the project to improve the user interface and user experience and also increased the selection of pokemon.
- **GitHub:** https://github.com/jonathancarpena/pokemon-guesser

EXPERIENCE

Freelance Web Developer | Full-Stack Software Engineer Hacky Birthday MLH | Front-End Engineer Carson Street Dance | Team Director

March 2022 - Present July 2022 August 2017 - March 2020
